# Local and national level frameworks and guidance

Title	Overview	Link
Generic Service Intervention: Dementia Competency Framework	Developed for the West Midlands, this outlines the vision of an integrated Dementia Pathway for the area based on person-centred care and benchmarks to understand skills and knowledge that care providers should aspire to. It is positioned as a tool to work 'toward' not work to.	Click Here
Dementia Core Skills Education and Training Framework	Commissioned by the Department of Health, this framework was developed in collaboration by Skills for Health, Health Education England and in partnership with Skills for Care. It aims to support the development and delivery of appropriate and consistent dementia education and training for the health and social care workforce by mapping a care pathway for workforce development. Structured into 3 tiers to target different levels of staff and contact with people living with dementia, it provides the background, learning outcomes, guidance and policy, sources of learning and development for each level.	Click Here
NICE Pathway – Dementia	The pathway sets out the pathway for dementia as a progressive illness and based on integration of services and approach. It outlines principles of care, staff training, risk factors, early identification, diagnosis, choice, support, support for carers as well as promoting independence and maintaining wellness, end up with a focus on palliative care.	Click Here
Prime Minister Challenge on Dementia 2020	Published in 2015, this document outlines what the government wants to see in place by 2020 in order for England to be the best country in the world for dementia care and support fro people with dementia, their carers and families to live and the best place to undertake research.	Click Here
Skills for Care – Common Core Principles for Supporting People with Dementia	This guide presents eight common core principles for supporting people with dementia. The guide can be used to help enable workforce development for staff working in health and social care. The principles aim to build confidence in adapting staff action and communication. Structured around setting out the principles, embedding them in an organisation and planning learning and development around the principles.	Click Here
Skills for Care – Learn from others	Useful resource for organisations and staff as a vehicle for sharing good practice in adult social care.	Click Here
